Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a wireless-type tire condition monitoring apparatus and a transmitter for the tire condition monitoring apparatus Which enable checking of tire conditions, including the air pressure in a tire, from the interior of a vehicle. Each independent claim identifies the uniquely distinct features "a transmission controller, controls the transmission device in accordance with an operating mode selected from a normal mode, in which data transmission is performed a predetermined number of times in a cycle of a predetermined length of time, and a temperature compensation mode, in which data transmission is performed a number of times greater than said predetermined number of times in the same cycle, and wherein said transmission controller determines whether to shift from the current one of the operating modes to the other operating mode by comparing the measured internal temperature of the tire with a predetermined threshold temperature" and "a transmission controller controls the transmission device in accordance with an operating mode selected from a normal mode in which data transmission is performed at first time intervals and a temperature compensation mode in which data transmission is performed at second time intervals shorter than the first time intervals, and wherein said transmission controller determines

whether to shift from the current one of the operating modes to the other operating mode by comparing the measured internal temperature of the tire with a predetermined threshold temperature". The closest prior art Tsujita (US 6,604,416) and Hardman et al. (US 6,885,296) discloses conventional vehicle remote tire monitoring system, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Brown (US 6,591,671) and Katou (US 6,861,950) are cited to show additional vehicle tire monitoring systems.
